The Scenario

Student: Student A
Grade: 4th Grade (Resource Room)

Document 1 (Teacher Observation):
"Student A is highly verbal and participates actively in Science discussions. However, when asked to read grade-level text or write independently, they exhibit task avoidance behaviors (head down, verbal complaints). Handwriting is significantly below grade level in legibility and endurance."

Document 2 (Reading Data):

- Oral Reading Fluency: 60 WPM
- Grade-Level Expectation: 115 WPM
- Error Pattern: Breaks down on multi-syllabic words → impacts comprehension

Document 3 (Writing Sample):
Prompt: “Describe the life cycle of a butterfly.”
Response: “it hach. it fly.” (4 words in 10 minutes)

Your Tasks

Task 1: Analysis of Need

Identify:

- Primary **Cognitive Barrier**
- Primary **Physical/Output Barrier**

1-Sentence Logic:
Explain how deficits in decoding fluency increase cognitive load and limit access to grade-level content, while fine-motor deficits reduce written output.

Power Words:
Decoding Fluency, Cognitive Load, Orthographic Processing, Fine-Motor Deficit, Dysgraphia

---

Task 2: Specially Designed Instruction (SDI)

Describe **TWO SDI strategies** that allow access to grade-level Science content.

1-Sentence Logic:
Reduce barriers by separating content mastery from decoding and handwriting demands.

Power Words:
Assistive Technology (AT), Text-to-Speech (TTS), Speech-to-Text, Universal Design for Learning (UDL), Scaffolded Instruction, Graphic Organizer

---

Task 3: Progress Monitoring

Describe:

- What data you will collect
- How often
- What mastery looks like

Power Words:
CBM (Curriculum-Based Measurement), WPM Growth, Written Output Metrics, Baseline vs Target

---

🔷 5 HIGH-LEVEL PRACTICE PROMPTS

These are exam-quality. Use them like drills.

Prompt 1 – Executive Function + Writing

Scenario

Student B (5th grade) completes math verbally but fails to turn in written assignments. Teacher notes: “He understands the work but doesn’t start tasks independently.”

Task

- Identify **Executive Function deficit**
- Provide 2 SDI strategies

1-Sentence Logic:
The issue is initiation and planning, not content knowledge.

Power Words:
Task Initiation, Executive Dysfunction, Chunking, Visual Schedule, Self-Monitoring

---

Prompt 2 – Reading Comprehension vs Fluency Trap

Scenario

Student C reads at 120 WPM (on grade level) but cannot answer comprehension questions.

Task

- Identify the **true cognitive barrier**
- Provide SDI

1-Sentence Logic:
Fluency ≠ comprehension; deficit lies in language processing.

Power Words:
Comprehension Monitoring, Inferencing, Language Processing, Schema Activation

---

Prompt 3 – Behavior vs Skill Deficit

Scenario

Student D refuses to write and throws pencil when frustrated.

Task

- Determine: **Behavior OR Skill deficit?**
- Provide intervention

1-Sentence Logic:
Behavior is a function of an unmet skill need.

Power Words:
Function of Behavior, Escape/Avoidance, Replacement Behavior, FBA, BIP

Prompt 4 – Math Word Problem Barrier

Scenario

Student E solves equations correctly but fails word problems.

Task

- Identify barrier
- Provide SDI

1-Sentence Logic:
Barrier is language comprehension, not math computation.

Power Words:
Academic Language, Translation Skills, Schema-Based Instruction, Visual Models

---

Prompt 5 – Processing Speed + Output

Scenario

Student F understands content but completes only half of tests.

Task

- Identify barrier
- Provide accommodations + SDI

1-Sentence Logic:
Slow processing limits output, not understanding.

Power Words:
Processing Speed, Extended Time, Reduced Task Demand, Output Accommodation

Prompt 6 – Phonological Awareness (Early Reading)

Scenario

Student G (1st grade) cannot blend sounds (e.g., /c/ /a/ /t/ → “cat”).

Tasks

- Identify cognitive barrier
- Provide 2 SDI strategies

Sentence Starter:
"The primary cognitive barrier is a deficit in _____, which limits the student's ability to _____. This impacts reading development because _____."

Power Words:
Phonological Awareness, Blending, Segmenting, Explicit Instruction, Multisensory

---

Prompt 7 – Dyslexia Pattern

Scenario

Student H (3rd grade) reads slowly, guesses words, avoids reading aloud.

Tasks

- Identify barrier
- Provide SDI

Sentence Starter:
"The student demonstrates characteristics consistent with deficits in _____, as evidenced by _____."

Power Words:
Decoding Deficit, Orthographic Mapping, Structured Literacy, Repeated Reading

---

Prompt 8 – Writing Output Collapse

Scenario

Student I can explain ideas verbally but writes only 1–2 sentences.

Tasks

- Identify barrier
- Provide SDI

Sentence Starter:
"The discrepancy between verbal expression and written output suggests a deficit in _____."

Power Words:
Written Expression, Dysgraphia, Transcription Skills, Speech-to-Text, Graphic Organizer

---

Prompt 9 – Attention vs Comprehension

Scenario

Student J "zones out" during reading and misses key details.

Tasks

- Identify barrier
- Provide SDI

Sentence Starter:
"The student's difficulty appears related to _____, which affects their ability to sustain attention to _____."

Power Words:
Sustained Attention, Active Engagement, Chunking, Guided Reading, Self-Monitoring

---

Prompt 10 – Math Fact Fluency

Scenario

Student K counts on fingers for basic addition.

Tasks

- Identify barrier
- Provide SDI

Sentence Starter:
"The student demonstrates a lack of automaticity in _____, which increases cognitive load during _____."

Power Words:
Automaticity, Math Fact Fluency, Retrieval Practice, Repetition, CBM

Prompt 11 – Social Cue Deficit

Scenario

Student L interrupts peers and misreads facial expressions.

Tasks

- Identify barrier
- Provide SDI

Sentence Starter:
"The student exhibits difficulty with _____, impacting peer interactions by _____."

Power Words:
Social Cues, Pragmatic Language, Social Skills Instruction, Modeling, Role Play

---

Prompt 12 – Emotional Regulation

Scenario

Student M shuts down when work is difficult.

Tasks

- Identify barrier
- Provide SDI

Sentence Starter:
"The student demonstrates challenges in _____ when faced with _____."

Power Words:
Emotional Regulation, Frustration Tolerance, Coping Strategy, Self-Regulation, Prompt Fading

---

Prompt 13 – Processing Speed

Scenario

Student N understands content but works very slowly.

Tasks

- Identify barrier
- Provide SDI + accommodation

Sentence Starter:
"The primary barrier is reduced _____, which limits the student's ability to _____ within time constraints."

Power Words:
Processing Speed, Extended Time, Reduced Task Demand, Output Limitation

---

Prompt 14 – Auditory Processing

Scenario

Student O struggles to follow multi-step verbal directions.

Tasks

- Identify barrier
- Provide SDI

Sentence Starter:
"The student's difficulty following directions suggests a deficit in _____."

Power Words:
Auditory Processing, Working Memory, Visual Supports, Repetition, Chunking

---

Prompt 15 – Reading Comprehension

Scenario

Student P reads fluently but cannot summarize.

Tasks

- Identify barrier
- Provide SDI

Sentence Starter:
"The student's fluency suggests intact decoding; however, deficits in _____ impact comprehension."

Power Words:
Inferencing, Main Idea, Comprehension Monitoring, Graphic Organizer

---

Prompt 16 – Behavior Escape Function

Scenario

Student Q leaves seat when writing tasks begin.

Tasks

- Identify function
- Provide intervention

Sentence Starter:
"The behavior likely serves an _____ function, as the student avoids _____."

Power Words:
Escape Behavior, Task Avoidance, Replacement Behavior, FBA, BIP

Prompt 17 – Vocabulary Deficit

Scenario

Student R struggles with grade-level science vocabulary.

Tasks

- Identify barrier
- Provide SDI

Sentence Starter:
"The student's difficulty is rooted in limited _____, which impacts understanding of _____."

Power Words:
Academic Vocabulary, Tier 2/3 Words, Pre-teaching, Explicit Instruction

---

Prompt 18 – Generalization Issue

Scenario

Student S learns skill in resource room but not gen ed.

Tasks

- Identify issue
- Provide SDI

Sentence Starter:
"The student demonstrates difficulty with _____ across settings."

Power Words:
Generalization, Transfer of Skills, Multiple Context Practice, Scaffolding

---

Prompt 19 – Fine Motor Writing

Scenario

Student T writes slowly with poor legibility.

Tasks

- Identify barrier
- Provide SDI

Sentence Starter:
"The student's writing difficulties are associated with deficits in _____."

Power Words:
Fine Motor, Handwriting, Occupational Support, Alternative Output

---

Prompt 20 – Working Memory

Scenario

Student U forgets steps in math problems.

Tasks

- Identify barrier
- Provide SDI

Sentence Starter:
"The student demonstrates limitations in _____, affecting their ability to _____."

Power Words:
Working Memory, Step Sequencing, Visual Supports, Checklists

Prompt 21 – Task Initiation

Scenario

Student V waits for help before starting any task.

Tasks

- Identify barrier
- Provide SDI

Sentence Starter:
"The student exhibits difficulty with _____, impacting independent task completion."

Power Words:
Task Initiation, Executive Function, Prompting Hierarchy, Gradual Release

---

Prompt 22 – Reading Accuracy vs Fluency

Scenario

Student W reads quickly but makes frequent errors.

Tasks

- Identify barrier
- Provide SDI

Sentence Starter:
"The student prioritizes speed over accuracy, indicating a deficit in _____."

Power Words:
Reading Accuracy, Error Correction, Guided Oral Reading, Feedback

---

Prompt 23 – Organization

Scenario

Student X loses assignments and materials.

Tasks

- Identify barrier
- Provide SDI

Sentence Starter:
"The student demonstrates deficits in _____, affecting task completion."

Power Words:
Organization, Executive Function, Systems, Visual Schedule

Prompt 24 – Multi-Syllabic Words

Scenario

Student Y struggles with long words in reading.

Tasks

- Identify barrier
- Provide SDI

Sentence Starter:
"The student has difficulty with _____, which disrupts reading fluency."

Power Words:
Syllabication, Morphology, Decoding Strategies, Word Analysis

---

Prompt 25 – Independence Fade

Scenario

Student Z relies heavily on para support.

Tasks

- Identify issue
- Provide fade plan strategy

Sentence Starter:
"The student currently depends on adult support for _____, limiting independence."

Power Words:
Prompt Fading, Independence, Gradual Release, Data Tracking

Ok we need to change littler strategy we are good with multiple question I need more support for writing as we dissucess pervious we need to change the prompt look and and how it display and also all new prompts I'm pasting here with the word file for you to change we keep look like prompt power word sentence starter and response after submitting anywise the answer with the question

1. User submits response
2. App highlights:
    - Missing **barrier**
    - Missing **power words**
3. THEN show ideal answer

That's how you actually improve performance.

I want you to make answer also for just incase as a ideal answer for the app to display after submission for all 25 prompts **IDEAL ANSWERS (PROMPTS 1–25)**

Prompt 1 – Science Reading/Writing Barrier

Ideal Answer:
The primary cognitive barrier is a deficit in **decoding fluency**, which increases cognitive load and limits the student's ability to process grade-level science text. The physical/output barrier is a **fine-motor deficit consistent with dysgraphia**, reducing written production and endurance. To address this, I would implement **text-to-speech (TTS)** to provide access to content and **speech-to-text** to bypass handwriting demands. Additionally, **graphic organizers** would support structured responses aligned with grade-level expectations.

Prompt 2 – Executive Function
